# Introduction

## What's New in this Release?

The 2017.03 release addresses issues identified in Exo Employer Services 2017.01. This release includes the updates introduced in the 2017.02 release.

**Note:** For full information on the compliance updates and other changes that were introduced in the 2017.01 release, see the [2017.01 Release Notes](#), which are available on the Exo Employer Services Education Centre.

The purpose of this document is to provide essential information on the installation and use of this release:

- The **Installation** section provides an overview of the installation process, including pre-installation requirements and post installation steps.
- The **New Features** section describes all new features introduced in this release.
- The **Resolved Issues** section describes all issues that have been addressed by this release.
- The **Known Issues** section details any issues in this release that have been identified as requiring attention.

**Need assistance?** If you have any questions or you need assistance with installing this update, contact MYOB Exo Support from 8:30AM to 5.00PM, Monday to Friday on 0800 MYOB Exo (0800 696 239) or via e-mail at [anzpayrollsupport@myob.com](mailto:anzpayrollsupport@myob.com).

# Installation

## Pre-Install Requirements

Requirements for PCs running Exo Employer Services components are detailed in the Minimum System Requirements document, available on the [MYOB website](#).

## Installing Exo Employer Services

Information on installing and upgrading MYOB Exo Employer Services is maintained on the MYOB Enterprise Knowledgebase. See the following articles:

- [Upgrading MYOB Exo Employer Services Online](#)
- [Upgrading MYOB Exo Employer Services Manually \(New Zealand\)](#)
- [How do I run Network.exe?](#)

**Note:** Check the Known Issues section on page 5 for any known installation issues.

## Post-Installation

After the installation is complete, the version numbers of all MYOB Exo Employer Services applications should be as follows:

Application	Version
MYOB Exo Employer Services	2017.03
MYOB Exo Payroll (NZ)	2017.03
MYOB Exo Health and Safety	2017.03
MYOB Exo Employee Information	2017.03
MYOB Exo Time and Attendance	2017.03
Runtime Files	09.00.0000.7423

To ensure that this release installed successfully, check that the versions displayed on the About window (**Help menu > About**) match the versions listed here.

# New Features

## Update for NSW Tax Code

*Introduced in Exo Employer Services 2017.02.*

The IRD has ruled that, for employee on the “NSW” tax code, the flat rate of 10.5% also applies to Extra Pay.

Exo Payroll has been updated to reflect the IRD’s position on this case: For pays ending on or after 1 April 2017, if an employee on the “NSW” tax code receives a payment that is subject to Extra Pay, their pay has a flat tax rate of 10.5%.

# Resolved Issues

The following issues have been addressed in this release:

Problem Record	Service Request	Description
143201363821	143196240722	Allowances that had a Cost Centre specified on the Allowance Maintenance window were instead using the employee default when added to a Standard or Current Pay. This has been resolved.
143247718459	143242735659 143236163904 143206791486 142664800258	In some cases, the "Termination HP" Allowance was not added to an employee's pay when the employee was terminated. This has been resolved.
142510571692	142476210854	<i>Introduced in Exo Employer Services 2017.02.</i> The error message "Error 1806 SQL Column 'ARCHIVED' is not found" appeared when logging in after upgrading a standalone install of Exo Time and Attendance to version 2017.01. If this error was dismissed, only the Demonstration Company would appear on the MYOB Login Screen. This has been resolved.

# Known Issues

## Error 2066 in a networked environment

The FoxPro error: "2066/Index file [filename].CDX is corrupt. Please rebuild it" can occur persistently on network systems that have a Server 2008 operating system with workstations running Windows Vista, Windows 7 or 2008 Terminal Server; or peer-to-peer networks where the server/workstation is running a Windows Vista or Windows 7 operating system, and one or more other workstations are also using a Windows Vista or Windows 7 operating system.

For information on this issue and suggested workarounds, see the following articles on the MYOB Enterprise Knowledgebase:

- [What to do when getting an Error 2066 message](#)
- [Consistent error 2066 in a networked environment](#)
